Hi John,

Today, we have performed the below tasks:

- Smoke Testing
- Test Case Execution
- Reporting Defects

As the smoke testing is passed, we have moved to the detailed testing, where we have started executing the Test Cases.

We have also come across the below defects while executing the test cases:

S.No	Defect#	Defect Title
1	TU1-I2	Thank you for registering' email is not received to the registered email address after registering an account
2	TU1-I3	User is able to register an account by providing an invalid phone number

Also, refer to the so far executed test cases in the enclosed document.

Tasks for Tomorrow:

- We will continue executing the Test Cases and reporting defects.

Regards,
Arun Motoori
Test Lead
